

## HAMMER - Manual Test Script - Candidate Scoring Form

1. Click the button labeled “Resume Form” on the left sidebar to access the form.
2. Make sure that the title at the top of the page are the words “Resume Form”. The page formatting should resemble that of a form.
3. Type in first and last name under the name field.
4. Try to click the save button. There should be a popup warning message in the Email field, since it is required but it is empty.
5. Type in the email address and attempt to save again. There should be a popup warning message in the phone number field.
6. Fill in the phone number field and attempt to save. This should go through without any warnings, because all required fields have been filled in.
7. A new form should automatically be opened after the previous one has been saved. The fields in the current form should be empty.
8. Fill in the required fields again.
9. Fill in the home address field. This field is optional, but should be able to accept input.
10. The next field should contain an “Upload Resume” button. Once clicked, the user should be able to attach a file and upload it to the form.
11. The name of the form should then appear under the “Upload Resume” button inside that field.
12. There should be 4 categories following the upload resume button. These should be labeled Education, Work, Extracurriculars and Skills and Awards. Check that those fields appear on the form.
13. Ensure that those fields contain drop down menus that carry numbers ranging from 1 to 5. These represent the scores a company can assign to the individual.
14. Attempt to assign a random score from the drop down menu. The form should be able to be saved without warning messages even if some of the 4 categories are not filled in.
15. At any time during the testing, clicking the cancel button should return the user to the home page.
16. Check that data from all submitted forms are saved.
17. Run Lighthouse and ensure accessibility score is above 90.
